

Acero Engineering Inc. ("Acero"), a growing facilities engineering company providing engineering, procurement and construction management expertise is currently seeking motivated and enthusiastic individuals to fill one employee/contract role: **Senior Project Manager – Fresh Water Pipeline.**

Acero is focused on facility and pipeline engineering, procurement and construction management services; from concept generation to plant start-up. Our core service offering is in-house project management, process, mechanical, electrical I&C engineering, project engineering, procurement, regulatory services and construction management.

Acero maintains a core belief that success depends on the development of long-term relationships, forged by providing clients what they ask for – which is not necessarily the same product across the board.

Why do employees stay at Acero? We provide a flexible and trusting team-oriented environment where hard work, discipline and honesty are encouraged and rewarded. We are driven to provide our clients with exceptional service.

Responsibilities:

- Provide technical leadership and manage client and vendor interaction for our client's project, specializing in river/lake offtake, fresh water pump stations, fresh water pipelines, and associated infrastructure
- Direct and utilize Project Engineers on projects
- Organize manpower and resources as needed on the various stages of the project that you will be involved with
- Prepare and maintain cost estimates, schedules, philosophies (eg. Design Basis, PEP, PMPP, etc.)
- Coordinate through the design/drafting group - PFD's, P&IDs, Plot Plans, Isometrics and GA's
- Evaluate quotes received for all typical equipment
- Effectively utilize your strong knowledge of codes, standards and specifications pertaining to mining and oil and gas industry equipment, vessels, pipe, etc.
- Act as Acero's key technical representative with the client – helping the sponsor maintain an excellent client relationship with open and clear communication
- Understand and work in accordance with Acero's and clients' HSE rules and regulations
- Other tasks/responsibilities, as required

Preferred Education, Experience and Skills:

- Bachelor Degree in Engineering (Mechanical or Pipeline)
- Minimum of 10+ years as a "Project Engineer" and/or "Project Manager", with related fresh-water pipeline project experience
- Successful performance in managing medium to large-sized EPCM or EPC projects
- Proven ability to work with a multidisciplinary team including Process, Project, Regulatory, Civil, Electrical, Instrumentation, Controls, Project Administration/Services, QC, Procurement and Construction Management
- Strong working knowledge of discipline-specific skills, codes and standard practices
- Ability to review and approve work and write clear, technical reports
- Ability to perform in a dynamic and fast-paced environment
- Highly organized with the ability to work within tight deadlines and manage multiple priorities
- Knowledge of applicable provincial, federal and industry codes and regulations
- Excellent interpersonal and communication skills

Compensation & Benefits:

Acero offers employees competitive wages and a benefits package. Salary will be commensurate with education and experience.

Interested candidates may submit a resume to: hr@aceroeng.com. No phone calls please.
