

Acero Engineering Inc. ("Acero"), a growing facilities engineering company providing engineering, procurement and construction management expertise is currently seeking a motivated and enthusiastic individual to fill a **contract** role as a **Hazardous Waste Incineration Specialist**.

Acero is focused on facility and pipeline engineering, procurement and construction management services; from concept evaluation to plant start-up. Our core service offering is in-house project management, process, mechanical, electrical I&C engineering, project engineering, procurement, regulatory services and construction management.

Acero maintains a core belief that success depends on the development of long-term relationships, forged by providing clients what they ask for – which is not necessarily the same product across the board.

Our clients are typically looking for quick turnaround, flexibility and fit-for-purpose deliverables, with no unnecessary additional frills.

Why do employees stay at Acero? We provide a flexible and trusting team-oriented environment where hard work, discipline and honesty are encouraged and rewarded. We are driven to provide our clients with exceptional service.

Responsibilities:

- As a subject matter expert, provide technical guidance and design recommendations for the equipment and processes applied to the incineration of hazardous waste materials
- Designing hazardous waste disposal procedures, including movement, containerization, storage, identification, record keeping and emergency response procedures
- Maintaining compliance with Provincial and Federal environmental permits and regulations
- Contributing to system, process and safety improvements
- Performing all work safely and with the utmost concern for the safety of self and others
- Providing support to the environmental and regulatory aspects of the incineration process
- Providing construction support, commissioning and operating procedures
- Collaborating within a team environment

Preferred Education, Experience and Skills

The candidate must:

- be located in Calgary, or surrounding area
- be a Subject Matter Expert for incineration of hazardous wastes
- have Post-Secondary Education in a related Engineering, Science, or Technical discipline
- have a minimum of 10 years related experience
- have the ability to utilize Microsoft Office Suite (Word, Excel, PowerPoint)
- have excellent team collaboration and interpersonal skills
- have strong written, verbal, analytical and critical thinking skills
- have proven ability to work under pressure and meet tight timelines as occasionally demanded by our clients

Interested candidates may submit a resume to: hr@aceroeng.com. **No phone calls please.**

Please reference "**Hazardous Waste Incineration Specialist**" in your cover letter and email subject line. Only those being actively considered for employment will be contacted. Only those who are qualified and who are legally authorized to work in Canada need apply.
