

Acero Engineering Inc. (“Acero”), a growing oil & gas facilities engineering company providing engineering, procurement and construction management expertise is currently seeking a motivated and enthusiastic individual to fill one role as **Senior Project Manager – Compression; minimum 15 years of experience.**

Acero is focused on facility and pipeline engineering, procurement and construction management services; from concept evaluation to plant start-up. Our core service offering is in-house project management, process, mechanical, electrical I&C engineering, project engineering, procurement, regulatory services and construction management.

Acero maintains a core belief that success depends on the development of long-term relationships, forged by providing clients what they ask for – which is not necessarily the same product across the board.

Our clients are typically looking for quick turnaround, flexibility and fit-for-purpose deliverables, with no unnecessary additional frills.

Why do employees stay at Acero? We provide a flexible and trusting team-oriented environment where hard work, discipline and honesty are encouraged and rewarded. We are driven to provide our clients with exceptional service.

Responsibilities:

As the Project Manager for the FEED of a large Greenfield full field development:

- Client and vendor interaction (ie. Managing projects) for numerous oil and gas projects and related facilities
- Direct and utilize Project Engineers and disciplines
- Organize manpower and resources as needed on the various projects that you will be involved with
- Prepare and maintain cost estimates, schedules, philosophies (eg. Design Basis, PEP, PMPP, etc.)
- Coordinate through the design/drafting group - PFD's, P&IDs, Plot Plans, Isometrics and GA's
- Evaluate quotes received for all typical oil & gas facility & pipeline equipment as well as pipeline and/or facility contractor bids
- Effectively utilize your strong knowledge of codes, standards and specifications pertaining to oil and gas industry equipment, vessels, pipe, etc.
- Act as Acero's key technical representative with the client – helping the sponsor maintain an excellent client relationship with open and clear communication
- Understand and work in accordance with Acero's and clients' HSE rules and regulations
- Follow Acero's established operating procedures and protocols (including strict adherence to the Staff Handbook)
- Other tasks/responsibilities, as required

Preferred Education, Experience and Skills:

- **Minimum of 15 years as a “Project Engineer” and/or “Project Manager” in Oil and Gas Facilities in Western Canada**
- **Strong compression experience is a “must have” – as the role involves FEED Management for the installation of booster compressors in a large Greenfield development.**
- Strong technical skills and working knowledge of discipline-specific skills, codes and standard practices such as; Directive 55, Directive 56, ASME B31.3, CSA Z662, ASME Section 8, API 650, 12 F, 610 etc.
- Experience with skid fabrication and design, equipment lists, line lists, mechanical equipment skids, pressure vessels etc.
- Fabrication shop experience and/or field experience would be an asset
- Understanding and working effectively with Word, Excel, Project, Visio, Bluebeam
- Excellent team collaboration, interpersonal and leadership skills
- Strong written, verbal, analytical and critical thinking skills
- Proven ability to work under pressure and meet tight timelines as occasionally demanded by our clients

Compensation & Benefits:

Acero offers employees competitive wages and a benefits package. Salary will be commensurate with education and experience.

Interested candidates may submit a resume to: hr@aceroeng.com. No phone calls please.
