

Acero Engineering Inc. (“Acero”), a growing oil & gas facilities engineering company providing engineering, procurement and construction management expertise is currently seeking a motivated and enthusiastic individual to fill one role as **Senior Project Manager - 20+ years of experience.**

Acero is focused on facility and pipeline engineering, procurement and construction management services; from concept evaluation to plant start-up. Our core service offering is in-house project management, process, mechanical, electrical I&C engineering, project engineering, procurement, regulatory services and construction management.

Acero maintains a core belief that success depends on the development of long-term relationships, forged by providing clients what they ask for – which is not necessarily the same product across the board.

Our clients are typically looking for quick turnaround, flexibility and fit-for-purpose deliverables, with no unnecessary additional frills.

Why do employees stay at Acero? We provide a flexible and trusting team-oriented environment where hard work, discipline and honesty are encouraged and rewarded. We are driven to provide our clients with exceptional service.

Responsibilities:

- Lead the execution of EPCM projects involving cryogenic gas processing facilities and modularized gas plant facilities, including coordination of engineering, procurement, construction, commissioning, and start-up activities.
- Apply a strong understanding of cryogenic gas process facilities/modularized gas plant facilities, equipment, piping, utilities, and associated infrastructure to effectively manage project execution.
- Provide Project Management Consultancy (PMC) services on behalf of clients, acting as the primary interface between the client, contractors, vendors, and other project stakeholders.
- Establish and maintain project controls, reporting systems, schedules, budgets, risk registers, and change management processes.
- Monitor contractor performance against contractual requirements, project milestones, budget, and quality standards.
- Lead project meetings, progress reviews, technical coordination meetings, and management reporting with clients and project stakeholders.
- Direct and utilize Project Engineers and discipline SMEs.
- Coordinate through the design/drafting group - PFD's, P&IDs, Plot Plans, Isometrics and GA's.
- Understand and work in accordance with Acero's and clients' HSE rules and regulations.
- Follow Acero's established operating procedures and protocols (including strict adherence to the Staff Handbook).
- Other tasks/responsibilities, as required

Preferred Education, Experience and Skills:

- **Minimum of 20 years as a “Project Engineer” and/or “Project Manager” in Oil and Gas Facilities in Western Canada and/or internationally**
- **Must have strong experience with Cryogenic gas plants, modular gas plants, and PMC experience**
- Strong technical skills and working knowledge of discipline-specific skills, codes and standard practices such as; Directive 55, Directive 56, ASME B31.3, CSA Z662, ASME Section 8, API 650, 12 F, 610 etc.
- Understanding and working effectively with Word, Excel, Project, Visio, Bluebeam
- Excellent team collaboration, interpersonal and leadership skills
- Strong written, verbal, analytical and critical thinking skills
- Proven ability to work under pressure and meet tight timelines as occasionally demanded by our clients

Compensation & Benefits:

Acero offers employees competitive wages and a benefits package. Salary will be commensurate with education and experience.

Interested candidates may submit a resume to: hr@aceroeng.com. No phone calls please.
